San Bernardino, CA 9241

**Re: Notice of Violations and Intent to File Suit Under the Federal Water
Pollution Control Act (Clean Water Act)**

Dear Messrs. Kelly, Wapner, and Boling, Ms. Welch, Head of Agency, Members of the City
Council and Members of the Board of Supervisors:

NOTICE OF ALLEGED VIOLATIONS

This Notice is provided on behalf of California River Watch (“River Watch”) in regard to
violations of the Clean Water Act (“CWA” or “Act”) 33 U.S.C. §1251 *et seq.*, that River Watch
believes are occurring at the Ontario International Airport owned and operated by the Ontario

International Airport Authority, the City of Ontario and San Bernardino County ("the Airport") located at 2500 and 2900 East Airport Drive in Ontario California. Notice is being sent to you as the responsible owners, operators, and managers of the Airport and real property. This Notice addresses the violations of the CWA, including violation of the new terms of the General California Industrial Storm Water Permit that replaced the "Group Monitoring" provisions, and the unlawful discharge of pollutants from the Airport through the West Cucamonga Channel, Cucamonga Channel, and Deer Creek directly to Cucamonga Creek, a CWA § 303(d) listed waterway impaired for cadmium, copper, lead, zinc, and coliform bacteria, and indirectly into the Santa Ana River, a CWA § 303(d) listed waterway.

CWA §301(a), 33 U.S.C. §1311(a), prohibits the discharge of any pollutant into waters of the United States unless such discharge is in compliance with various enumerated sections of the Act. Among other things, Section 301(a) prohibits discharges not authorized by, or in violation of, the terms of an individual National Pollutant Discharge Elimination System ("NPDES") permit or a general NPDES permit issued pursuant to CWA §402(p), 33 U.S.C. §1342. CWA §402(p), 33 U.S.C. §1342(p), establishes a framework for regulating storm water discharges under the NPDES program. States with approved NPDES permitting programs are authorized under this section to regulate storm water discharges through permits issued to dischargers and/or through the issuance of a single, statewide general permit applicable to all storm water dischargers. Pursuant to CWA §402, the Administrator of the U.S. EPA has authorized California's State Water Resources Control Board to issue NPDES permits including general NPDES permits in California.

The State Water Resources Control Board elected to issue a statewide general permit for industrial discharges, and issued the General Permit on or about November 19, 1991, modified it on or about September 17, 1992, reissued it on or about April 17, 1997, and amended it significantly on April 1, 2014 (effective July 1, 2015), pursuant to CWA §402(p). In order to discharge storm water lawfully in California, industrial dischargers must comply with the terms of the General Permit or have obtained an individual NPDES permit and complied with its terms.

CWA §505(b) requires a citizen to give notice of the intent to file suit sixty (60) days prior to the initiation of a civil action under Section 505(a) of the Act. Notice must be given to the alleged violator, the U.S. Environmental Protection Agency ("EPA"), and the state in which the violations occur. As required by the CWA, this Notice provides notice of the violations that have occurred, and continue to occur at the Airport. Consequently, the Ontario International Airport and the Ontario International Airport Authority, (collectively, the "Discharger") are placed on formal notice by River Watch that after the expiration of sixty (60) days from the date of this Notice, River Watch will be entitled to bring suit in the United States District Court against the Discharger for continuing violations of an effluent standard or limitation, NPDES permit condition or requirement, or Federal or State Order issued under the CWA (in particular, but not limited to, CWA §301(a), §402(p), and §505(a)(1), as well as the failure to comply with requirements set forth in the Code of Federal Regulations and the Santa Ana Regional Water Quality Control Board ("RWQCB") Water Quality Control Plan or "Basin Plan."

The CWA requires that any Notice regarding an alleged violation of an effluent standard or limitation or of an order with respect thereto shall include sufficient information to permit the recipient to identify the following:

1. The specific standard, limitation, or order alleged to have been violated.

To comply with this requirement, River Watch notices the Discharger of ongoing violations of the substantive and procedural requirements of CWA §402(p) and violations of NPDES Permit No. CAS000001, State Water Resources Control Board, Order No. 92-12-DWQ as amended by Order No. 97-03-DWQ and Order No. 2014-0057-DWQ (the "General Permit") relating to the recycling services and operations at the Airport.

The Discharger, rather than seeking coverage under an individual NPDES permit, filed a Notice of Intent ("NOI") agreeing to comply with the terms and conditions of the General Permit. The State Water Resources Control Board approved the NOI on or about October 25, 2016 and the Discharger is assigned Waste Discharger Identification ("WDID") number 8361026885. River Watch contends that in the continuing operation of the Airport, the Discharger has failed and is failing to comply with the terms and conditions of the General Permit – specifically the requirements governing sampling and analysis, the foundation upon which the Airport can prepare and implement effective Best Management Practices ("BMPs") in its Storm Water Pollution Prevention Plan ("SWPPP"), ensuring the elimination of all non-authorized storm water discharges.

Compliance with these General Permit requirements is central to the effectiveness of the General Permit program. River Watch alleges the Discharger has failed and is failing to comply with the General Permit annual reporting requirements for reporting years 2015-2016 and 2016-2017. The General Permit in effect beginning July 1, 2015 (Order No. 2014-0057-DWQ), revised significantly the reporting requirements for industrial facilities such as the Airport that were covered under the "Group Monitoring" provisions of the 1997 General Permit.

The Discharger has violated and is violating the General Permit as follows:

- The new General Permit required "existing dischargers" to submit "permit registration documents" ("PRDs") for coverage under the new General Permit by July 1, 2015 (*see* General Permit Section II.B.4). The Airport, in operation for decades prior to this deadline (and therefore covered under the current and prior General Permits dating back to the early 1990s) violated this General Permit provision by submitting the required PRDs - the NOI was submitted October 18, 2016, the SWPPP is dated October 31, 2016 - more than a year after the July 1, 2015 deadline.
- The new General Permit provides that "Group Monitoring, as defined in the previous permit, has been eliminated and replaced with a new compliance option called Compliance Groups. The Compliance Group option differs from Group Monitoring as it requires (1) all Dischargers participating in a Compliance Group (Compliance Group Participants) sample two QSEs [qualifying storm events] each year ..." *See* General Permit Fact Sheet Section II.M; Permit Section XI.B.3. A review of the SMARTs

database reveals that the Airport failed to submit the two QSEs for Annual Reporting Year 2015 -2016.

- The failure to monitor, sample, and provide reports via SMARTs violates the “Sampling and Analysis” provisions of the new General Permit (*see* General Permit Section XI.B.6) which requires that “[t]he Discharger shall analyze all collected samples for the following parameters: a. Total Suspended Solids (TSS) and oil and grease (O&G); b. pH ...; c. Additional parameters identified by the Discharger on a facility-specific basis that serve as indicators of the presence of all industrial pollutants identified in the pollutant source assessment ... These additional parameters may be modified (added or removed) in accordance with any updated SWPPP pollutant source assessment.” These “potential pollutant sources” are identified by the Discharger in its SWPPP (*see* Table 3.1) as Anti-freeze, Anti-icing Fluid (Glycol-based), Brake fluid, Degreaser, Diesel Fuel, Engine Oil, Gasoline, Hydraulic Fluid, Jet Fuel, Transmission Fluid, Waste Fuel, and Waste Oil. The SWPPP (*see* Table 1.2) also identifies Total Copper and Total Zinc in its listing of “Applicable NAL Values.”¹ River Watch alleges that the Discharger’s failure to provide full sampling results for these parameters is a violation of the General Permit.

2. The activity alleged to constitute a violation.

The Discharger’s operations, defined in Section 3.1 of the current SWPPP as “[i]ndustrial activities conducted onsite at [the Airport] that could be potential sources of pollution include Aircraft Vehicle and Equipment Maintenance, Aircraft and Vehicle Fueling, Waste and Recyclables Storage, Aircraft and Vehicle Washing, Anti-icing, Material Loading/Unloading, Chemical and Fuel Storage and Building and Grounds Maintenance,” and classified on the NOI as SIC Code 4581 (“Airports, Flying Fields, and Airport Terminal Services”), trigger monitoring and sampling for the full range of mandated and “additional parameters” listed in paragraph 1 above.

The work at the Airport is conducted both indoors and outdoors, where it is subject to rain events. Because there is no State Water Resources Control Board or RWQCB exemption from the collecting and analyzing of the range of pollutants identified above, and without implementing the full range of required sampling and analysis, there is no accurate measure by which to determine whether required BMPs are both implemented at the Airport and effective to ensure no unlawful discharge(s) of the pollutants identified above from the Airport discharge to – Cucamonga Creek and the Santa Ana River - waters of the United States.

To properly regulate these activities and control the discharge of these types of pollutants, the State Water Resources Control Board requires industrial facilities to obtain and comply with the terms and conditions of an individual NPDES permit or seek coverage under the General Permit (or obtain a proper exemption under the terms of the General Permit from its requirements). As stated above, review of the public record by River Watch reveals that the Discharger obtained coverage under the General Permit for the Airport, but fails to comply with

¹ Review of laboratory samples submitted by other SIC Code 4581 airport facilities identify copper, zinc, and lead as additional parameters requiring sampling and analysis by the Discharger.

its environmentally protective requirements, in particular the mandated sampling and analysis of storm water discharges from the Airport.

Note that in addition to the pollution controls in the General Permit, the RWQCB has established water quality standards applicable to facilities such as that operated by the Discharger. The RWQCB's Basin Plan includes both a narrative toxicity standard and a narrative oil and grease standard, providing that "[w]aters shall not contain suspended material in concentrations that cause nuisance or adversely affect beneficial uses." The Basin Plan establishes limits on metals, solvents, pesticides and other hydrocarbons.

3. *The person or persons responsible for the alleged violation.*

The entities responsible for the alleged violations are the Ontario International Airport and the Ontario International Airport Authority, the City of Ontario and San Bernardino County, referred to collectively herein as the Discharger.

4. *The location of the alleged violation.*

The location or locations of the various violations is the permanent address of the Airport at 2500 and 2900 East Airport Drive in Ontario, California, including the waters of Cucamonga Creek and the Santa Ana River – waters of the United States.

5. *The date or dates of violation or a reasonable range of dates during which the alleged activity occurred.*

The range of dates covered by this Notice is from July 1, 2015 to December 8, 2016. River Watch will from time to time update this Notice to include all violations which occur after the range of dates covered by this Notice. Some of the violations are continuous in nature, therefore each day constitutes a violation.

6. *The full name, address, and telephone number of the person giving notice.*

The entity giving this Notice is California River Watch, an Internal Revenue Code § 501(c)(3) nonprofit, Public Benefit corporation organized under the laws of the State of California, with headquarters located in Sebastopol, California. River Watch's mailing address is 290 South Main Street, #817, Sebastopol, California 95472.

River Watch is dedicated to protecting, enhancing and helping to restore surface and ground waters of California including rivers, creeks, streams, wetlands, vernal pools, aquifers and associated environs, biota, flora and fauna, and to educating the public concerning environmental issues associated with these environs.

River Watch may be contacted via email: US@ncriverwatch.org, or through its attorneys. River Watch has retained legal counsel with respect to the issues set forth in this Notice. All communications should be directed to:

REMEDIAL MEASURES REQUESTED

River Watch believes that implementation of the following remedial measures are necessary in order to bring the Discharger into compliance with the CWA and reduce the biological impacts from its non-compliance upon public health and the environment surrounding the Airport:

1. Prohibition of the discharge of pollutants including, but not limited to:
 - pH, total suspended solids, total organic carbon or oil & grease (the standard pollutants); and
 - all "Potential Pollutant Sources" listed in the Discharger's current SWPPP.
2. Preparation and submittal to the RWQCB of a "Reasonable Potential Analysis" for the Airport and its operations.
3. Preparation of further updates to the Airport's October, 2016 SWPPP that includes, but is not limited to, additional BMPs necessary to address any violations identified by required sampling and analysis.

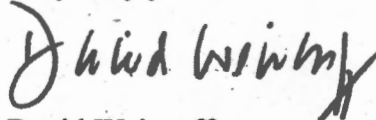

CONCLUSION

The violations set forth in this Notice effect the health and enjoyment of members of River Watch who reside and recreate in the affected community. Members of River Watch may use the affected watershed for recreation, sports, fishing, swimming, hiking, photography, nature walks and/or the like. Their health, use, and enjoyment of this natural resource is specifically impaired by the Discharger's alleged violations of the CWA as set forth in this Notice.

CWA §§ 505(a)(1) and 505(f) provide for citizen enforcement actions against any "person," including individuals, corporations, or partnerships, for violations of NPDES permit requirements and for un-permitted discharges of pollutants. 33 U.S.C. §§ 1365(a)(1) and (f), §1362(5). An action for injunctive relief under the CWA is authorized by 33 U.S.C. §1365(a). Violators of the Act are also subject to an assessment of civil penalties of up to \$37,500 per day/per violation for all violations pursuant to Sections 309(d) and 505 of the Act, 33 U.S.C. §§ 1319(d), 1365. See also 40 C.F.R. §§ 19.1-19.4. River Watch believes this Notice sufficiently states grounds for filing suit in federal court under the "citizen suit" provisions of CWA to obtain the relief provided for under the law.

The CWA specifically provides a **60-day** "notice period" to promote resolution of disputes. River Watch strongly encourages the Discharger to contact River Watch within **20 days** after receipt of this Notice to: (1) initiate a discussion regarding the allegations detailed in this Notice, and (2) set a date for a site visit to the Airport. In the absence of productive discussions to resolve this dispute, or receipt of additional information demonstrating that the Discharger is in compliance with the strict terms and conditions of the General Permit, River Watch intends to file a citizen's suit under CWA § 505(a) when the 60-day notice period ends.

Very truly yours,

David Weinsoff
